Maintenance Mechanic Worker 07

WG-4749-07

NOTE: THE SENTENCE IN PART I DESCRIBING THE PURPOSE OF THE POSITION AND PARTS II AND III IN THEIR ENTIRETY ARE PERMANENT PARTS OF THE LIBRARY AND MAY NOT BE CHANGED OR EDITED IN ANY WAY.

I. INTRODUCTION

This position is located

The incumbent serves as an intermediate level maintenance mechanic.

II. MAJOR DUTIES AND RESPONSIBILITIES

Under close supervision, performs maintenance and repair tasks in the upkeep of buildings, grounds and related structures, fixtures, and utilities which require the performance of a variety of trade practices associated with two or more trades.

III. FACTOR LEVELS

Factor 1: Skill and Knowledge

Ability to learn shop mathematics sufficient to plan, compute, and layout projects. Ability to learn how to read, interpret, and apply building plans and blueprints.

Knowledge of accepted trade methods and techniques. Skill in the proper usage of tools and equipment common to the trade.

Developmental knowledge, skills, and abilities in at least two of the trades which include the following:

A. Plumbing. Knowledge of the installation and operation of various supply, disposal, and utility systems and equipment, such as water and gas systems fire sprinkler equipment, and water closets.

B. Carpentry. Knowledge of wood and wood substitute materials and construction techniques; skill in construction techniques and operation of general and precision carpentry and woodworking equipment to produce the requested finished product. Ability to interpret complex instructions, sketches, blueprints, and building codes.

C. Electrical. Ability to install and operate electrical fixtures, wiring, and controls and read and follow wiring diagrams. Skill in removing and replacing electrical fixtures and controls; making repairs; rearranging old or installing new outlets, relays, switches, and light fixtures; testing circuits; measuring, cutting, and bending wire and conduit to specified lengths and angles. Knowledge of mechanical theory and pneumatic and hydraulic principles to repair electro-mechanical devices.

D. Painting. Skill in accepted surface preparation and coating methods and techniques; matching, tinting, toning, blending and applying coating materials and agents. Ability to read and apply directions to mix, use and apply various materials, solvents, and precoating agents.

E. Plastering. Knowledge and skill in a variety of plastering methods and techniques, including construction and application of molded plaster cornices, plaster panels, and trim.

F. Pipefitting. Knowledge and ability to install and operate various high-pressure piping systems and equipment.

G. Air Conditioning. Knowledge of the principles and theories of the refrigeration cycle, temperature measurement, refrigerant properties. Skill in constructing, operating, and servicing a variety of domestic air conditioning units and systems, power sources, and cooling units.

H. Heating. Knowledge of combustion, heat transfer and circulation principles; fuel characteristics; heating surfaces, combustion chambers; basic pipefitting techniques and rigging setups; pneumatics, electricity, and basic electronics. Familiarity with the construction and operation of heating systems. Skill in determining condition of system parts and components; installing, aligning, adjusting, and repairing oil, gas, and coal burners, heating boiler components, and other burning mechanisms; performing routine maintenance.

Factor 2: Responsibility

The incumbent works under the close guidance of a journeyman, supervisor, and/or work leader. The supervisor assigns work orally or through work orders. A journeyman provides instructions on new assignments. As the incumbent's skill and knowledge increases, the amount of instructions and directions given decreases until the incumbent reaches the journeyman level. The incumbent is expected to recognize and refer situations or problems which require higher level guidance. Guides for proper completion of assignments include work orders, oral instructions, blueprints, sketches, specifications, and accepted trade practices and standards.

Factor 3: Physical Effort

The work requires a considerable amount of standing, stooping, bending, kneeling, climbing, and working in tiring and/or uncomfortable positions. The incumbent may work from ladders and scaffolding. Operating equipment may vibrate and jerk and cause a great deal of strain from required reaching, bending, turning and moving of hands, arms, feet and legs. The incumbent carries, lifts, and handles parts and equipment weighing up to 50 pounds and may occasionally exceed 50 pounds.

Factor 4: Working Conditions

The work is performed inside and outside with exposure to all kinds of weather. Work area maybe dirty, wet, dusty, and greasy, with inadequate lighting, heat, or ventilation. Incumbent is subject to cuts, abrasions, burns, broken bones, electrical shock, infections, bites, exposure to inhalation or harmful chemical fumes, irritation of eyes, skin and respiratory tract, and the hazards of operating power tools and equipment. Discomfort is encountered when wearing protective clothing, gloves, or eye goggles.

This position is non-exempt from coverage under the FLSA.
